## Measurement Guide

### Depth:

Measure the top of your gutter from front to back. This determines the gutter depth. It should be 5" or 6" depths. The standard Safe Flow Wave insert fits all 5" and 6" K Style gutters.

### Linear Feet:

Measure the length of the existing gutters on your house to determine linear feet. Safe Flow Wave is available in 4' sections.

## Easy Installation

Slide Safe Flow Wave under the existing gutter spikes and pull across the length of the gutter.

Safe Flow Wave slides right over the downspout area with the open channel underneath to allow the water to flow through. It's that easy!

No hardware or additional tools are needed. No training is necessary. Safe Flow Wave WILL NOT void any roofing or siding warranties, since there are no roofing nails, tar or tacking required.

## NEW Advanced Protection™ Process

### BIOCIDE & FUNGICIDE

inhibits growth of mold, mildew, fungus, algae and moss

### UV STABILIZER

prevents degradation from the sun

### DYNAMIC WAVE PROFILE

for increased water flow rate

**5 YEAR NO CLOG WARRANTY**

*Gutters Remain Clean & Clear of Clogs*

# Safe Flow Wave Advantages . . .

### ► Form, Function & Design

Safe Flow Wave is an open cell polyurethane insert, specially shaped and cut to fit snugly into your gutter. Even during the heaviest of rainstorms, the water flows through the Safe Flow Wave into the gutter valley and out the downspout.

Leaves and debris slide off the surface or just dry up and blow away. Your gutters will remain clean and clear of clogs.

### ► Proven Technology

Biocide and Fungicide that inhibits the growth of mold, mildew, fungus, algae and moss in Safe Flow Wave's material. And finally, a UV Stabilizer that prevents degradation from the sun.

### ► Lightweight & Flexible

The Safe Flow Wave lightweight and flexible design make installation a dream for the homeowner or contractor. Just slide Safe Flow Wave under the existing gutter spikes and pull across the length of the gutter. No hardware or additional tools are needed. It's that easy!

### ► Safe Flow Wave works like no other gutter protection

Clogged gutters can cause water damage to your home. Install Safe Flow Wave and protect your home from foundation problems, basement leaks, rotting windows, rotting fascia boards and soffits, mold and mildew, and insect infestation.

Our sleek and streamlined design is virtually invisible once installed and will not interfere with the beauty of your home.

### Dealer Notes:

*An absolutely worry-free, maintenance-free, cost-effective gutter protection system.*

Leaves and debris slide off the surface or just dry up and blow away.

Even during the heaviest of rainstorms, water flows straight through the Safe Flow Wave into the gutter valley and out the downspout.

Dynamic wave in action

Open cell polyurethane gutter insert utilizes 100% of the gutter capacity to allow maximum water intake.

Regardless of your roof pitch, Safe Flow Wave handles the MOST water intake of any gutter protection system in the industry.
